Kite Board You Build

Synopsis

This book is about how to build your own High Performance Kiteboards for 1/10th the price of a brand name board. We here in sunny Tampa, Florida have written this E-book to be as easy to follow as possible. We have truly made it Idiot/Lazy/ADD proof. Anyone can build a kiteboard! Plus the kiteboard can be completed in about 4 hours. You'll be Kiteboarding in no time! It began when my Dad bought a Jimmy Lewis Kiteboard for \$850. At first that seemed like a reasonable price for a Kiteboard. Then while looking the board over it dawned on him "bet we could build a kiteboard using light weight wood that would be just as good as our expensive Jimmy Lewis Kiteboard." Well he accomplished this goal and then some. After years of exhaustive experimentation and discovery his kiteboards were complete. This book captures every bit of insight and error he discovered while building the Ultimate Kiteboard. His results may shock and appall you. For example, the resulting boards were lighter, with a deeper rocker, and were more flexible than a kiteboard costing nearly 20 times as much (\$50 vs \$850). We managed to compile all of his insights and mistakes into one clear, concise and easy to read, picture filled E-Book. He made the time consuming discoveries and painful mistakes so you don't have to! If you love Kiteboarding but don't want to spend an arm and a leg on a kiteboard than this is the E-book for you! We fully stand by our product and if you are not satisfied for any reason there is a full thirty day money back guarantee. Thank you, now let's build a High Performance Kiteboard together! And save some money! Signed, Your Fellow Kiteboarder on a budget, Chris

Customer Reviews

Not wanting to waste a lot of time re-inventing the wheel, I picked up a digital copy. I am pretty handy, and I could have figured out how to build a board (eventually) but it would have taken a lot more trial-and-error. This how-to breaks it down very succinctly and makes the process easy if you are good around a shop. The board that I built works very well and cost so much less than my Cabrinha that my wife keeps asking why I didn't just build a board in the first place. Buy this how-to if you want to end up with a great board, super cheap, and with minimal fuss. Thanks to the author and his dad for sharing what they have learned over the years! Aloha.

Pretty good and simple instructions to build a basic wooden kiteboard. Would like to see another addition which gets into composite use.
