Solar System Stickers (Dover Little Activity Books Stickers)

Synopsis

Add visual excitement to your homework assignments, to stationery, windows, walls, and other flat surfaces with the 18 fascinating sticker illustrations in this colorful and educational collection. You'll find accurate drawings of the sun and all the planets in our solar system as well as moons, asteroids, and a comet. There are realistic drawings of Mercury (the smallest Planet), cloud-shrouded Venus, Jupiter and its four moons, Saturn and its rings, and ten other heavenly bodies. Identification captions are included.

[Crafts & Games > Activity Books](#) #6906 in [Books > Reference](#)

Age Range: 4 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

My son loves the solar system, so I purchased this little sticker book for him. He loved it, of course! The only "complaint" I have (and it's really not THAT huge of a deal -- but you may want to know before buying) is that the planet stickers are all the same size... even the sun is the same size as the planets. I suppose it would have to be a larger book in order to put Jupiter in proportion to Mercury, Venus, Earth, and Mars!

A lot of other reviewers complained that this is just stickers (one of each) in a non-reuseable book. But that's all I wanted anyway. And I couldn't beat the price. Michael's was asking triple this price for planet stickers that only included the 8 planets and nothing else. This has some moons and a

comet, etc.

These solar system stickers are super cute! My 1.5 year daughter is obsessed with the solar system so I made her little planet, moon & Galaxy magnets using these stickers. With these stickers, a little mod podge, wood circles and magnets she has her own little solar system to play with. And after playing with all her new magnets she can name all the planets! Fun, cute & educational!

This is a tiny book of stickers of planets, some comets and suns. Very few of the stickers are duplicates. I ordered three of these, and one came in with black and white pages instead of full color...not worth returning at the price I paid, though. Good for sticker rewards.

Usually I do read all the info, this time I didn't. It is a LITTLE activity book. There are exactly 18 stickers, all about the same size. No information or order except the name of each planet, moon or comet.

I feel like this is probably for children, but as a grown up child, I love this little sticker book. I went through the first one so quickly that I ordered a second... and i may need to order a 3rd soon.

This is a mini sticker book, it fit in the hand and has no to many stickers, it work however if you need to illustrate a homework or a notebook.

The book contains circles which stick on something. There isn't anything inside the book which would place them in their order in the solar system. This is not an aid in learning as I thought it would be. Disappointed to say the least.
