Dynamical Systems: Examples Of Complex Behaviour (Universitext)

Synopsis

Breadth of scope is unique Author is a widely-known and successful textbook author Unlike many recent textbooks on chaotic systems that have superficial treatment, this book provides explanations of the deep underlying mathematical ideas No technical proofs, but an introduction to the whole field that is based on the specific analysis of carefully selected examples Includes a section on cellular automata

Book Information

Series: Universitext

Paperback: 190 pages

Publisher: Springer; 2005 edition (October 10, 2008)

Language: English

ISBN-10: 3540229086

ISBN-13: 978-3540229087

Product Dimensions: 6.1 x 0.5 x 9.2 inches

Shipping Weight: 10.6 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 starsÂ Â See all reviewsÂ (1 customer review)

Best Sellers Rank: #3,197,190 in Books (See Top 100 in Books) #78 inÂ Books > Science & Math > Physics > Entropy #492 inÂ Books > Science & Math > Mathematics > Applied > Linear Programming #981 inÂ Books > Science & Math > Mathematics > Pure Mathematics > Algebra > Linear

Customer Reviews

Disclaimer: i've only read the first 2 chapters.This book took me by surprise, not only because I was unfamiliar with the subject which turned out to be very interesting (I was particularly interested in the material on entropies of dynamical systems). Mainly because the style is easy-going, reminiscent of how a good teacher might explain it live. All this, without being repetitive, vague, or leaving you with the feeling that you're missing out on something. That said, I have nothing to compare it to on this topic, but I like it.
