Electric Sasquatch: How A Natural Force May Explain "Supernatural" Powers

Synopsis

In ELECTRIC SASQUATCH, Christopher NoÃ«l offers a rational explanation for many of the seemingly âœsupernaturalâ• abilities displayed by this primate species. One by one, he takes on mystical claims, showing how the capacity to manipulate naturally occurring electricity can allow Sasquatch to perform such remarkable feats as making their eyes glow, âœzappingâ• people with pulses of energy, disrupting our electronic equipment, creating flashes of light and âœorbsâ•...and even apparently vanishing into thin air. This versatile use of electricity is certainly, by itself, an impressive evolutionary adaptation, but itâ™s far friendlier to the laws of physics than notions of fallen angels, demons, spirit beings, shapeshifters, star people, or interdimensional travelers. NoÃ«l spotlights Sasquatch as a flesh-and-blood creature endowed, yes, with unique and breathtaking qualities, but firmly embedded in the natural world.

Christopher NoÃ«l is the author of THE SASQUATCH SAVANT THEORY, OUR LIFE WITH BIGFOOT: Knowing Our Next of Kin at Habituation Sites, and THE MIND OF SASQUATCH AND THE SECRET TO THEIR SUCCESS. His YouTube channel is Impossible Visits. NoÃ«l lives with his daughter in Vermontâ™s Northeast Kingdom and can be reached at horseradiant@aol.com.

Customer Reviews

I like Christopher Noel's writings. In his research he tries to find plausible answers to the mystery that is bigfoot. Many people report getting zapped around bigfoot cloaking and eye shine without light. Christopher takes these subjects on with explanations that are within the bounds of science not the paranormal. Good job.

For those of you curious about the supernatural or paranormal powers of Sasquatch that have been presented in books or perhaps you've experienced them yourself, than this book may have a few answers for you. Christopher Noel has presented a plausible explanation and backed it up with research. If you are looking for something other than scary campfire stories and would like to know more about the true nature of Sasquatch, I recommend this author's other books on the subject.

Very well written hypothesis relative to the possibility that Sasquatch possess the ability to emit electromagnetic waves as a defense mechanism to confuse and disorient anyone who ventures too close to them. This idea comes from the same author who's penned a couple of other interesting books positing the idea that Sasquatch behavior seems to parallel some of the capacities and abilities of persons with the savant syndrome. Both thought provoking theories are presented with several first hand experiences and a number of eyewitness reports to lend to the strength of these ideas. Very well done!

Christopher Noel is a warm, concise and very interesting writer presenting a well thought out hypothesis which peaks the curiosity without raising the super-skeptical flag...which can block curiosity. He shares his explorations and immersion in the realm of the Sasquatch with care, sincerity, intelligence and good intentions. I'd recommend all of his books and videos.

I loved this book. It was very interesting & thought provoking!
