Head of Medusa by Michelle Madow
Book #3: Elementals Series
Source: Publisher/Author
My Rating: 5/5 stars
My Review: I've been a fan of this series from the very beginning and I've been waiting for that one book that just fired me up and allowed me reach the coveted 5-star review. Head of Medusa did just that!!! The book opens with a confident group of kids fresh off their last ultimately successful fight. Their powers are evolving, their control is getting better every day, and their confidence is at an all-time high. Unfortunately, they have yet to close the portal to hell and know their next mission is likely right around the corner. Indeed, it is and the next mission isn't going to be easy. In fact, this new mission is arguably even more dangerous than their last and they lost a team member during that battle. Their current challenge has the team travelling to Antarctica where they must retrieve a mythical sword with the ability to kill even the un-killable. As if the challenge of Antarctica weren't enough, the sword is encased in ice and guarded by a minor goddess who takes her job quite seriously. In fact, if the team fails to take the sword after three attempts, they are bound to the site for seven years of labor. Once the team retrieves the sword, the fun really begins as they travel to California to either enlist Medusa's help or take her head by force. With that being accomplished, the team must then stop Typhon, one of the scariest and deadliest of the big bads to have ever roamed the Earth. If Typhon is allowed to regain his full strength and power, the world's population is in danger. So, no pressure! From the moment they portal into Antarctica to the very last page, the team is set upon from every side.

Title: The Head of Medusa
Series: Elementals
Note: Book 3
Author: Michelle Madow
This is my review of The Head of Medusa, the 3rd book in the Elementals Series. I got this book free in exchange for an honest review. This is the continuation of a great world but be warned though you will not want to stop with just this one book and you will want to know the whole series. The book moves at a good pace and keeps you interested. I highly suggest you read book 1 and 2 first in order to know what is going on. This series has quickly become one of my favorites right now. (((This may have spoilers for you if you have not read book 1 & 2))) This all starts out in book one when The Olympian Comet shoots through the sky for the first time in over 3,000 years and with its arrival it gives 5 people Elemental powers. This comet also opens the portal to where the Titans have been imprisoned. This

starts the 5 elementals on the path of a prophecy they must solve in time to save the world? I love Greek mythology so when I was given the chance to read these books I was so excited. On a school field trip is when the comet affects Nicole, Blake, Danielle, Kate, and Chris. People who wouldn't really care about each other normally but now are forced to work together. In book 2 Nicole is dealing with her gift of killing with one touch and trying to hide it while the Elementals try to stop evil creatures from rising back up to destroy the world. With the portal to Kerberos and the Titans getting weaker by the minute they must keep fighting and have spent the past month since their first mission training. The group dynamics changed and they were also forced to try to get special weapons to stop the creatures.
