I enjoy finding a series that just continues to grow and improve. Arctos is the fourth installment in the Phantom Warriors series. The characters were well developed as was the storyline. I look forward to the next book.

First book in this series that I've read and it was pretty good. I wish it had been a little longer but I liked the story and the characters came across as believable. Not sure I believe that anyone in there right mind would venture out in the the Alaska wilderness by themselves but what the heck this is after all fantasy romance!! Short read that kept my interest, I will buy one more in the series to make sure this is an author that has staying power.

I love this series of the phantom warriors. She's become one of my favorite authors and I look for her books to ready. This is the latest in this series and I have enjoyed every single one of her books. Everytime I fall for the hero.

I have to say that first I am biased since I have come to love this series but I do enjoy the characters in this series. The author does a great job giving them all personalities of their own and some originality of where the story goes. It is a short read and they are hard to develop not just the characters but the story but it is done pretty well.

I have no issue with Jordan Summers writing and found the story entertaining. I do not mean to pick on this author, but I have two issues here. In what universe is 85 pages considered a book? This is a short story or novella and should be described as such in the book description. This seems to be a trend in the e-book arena, publishing shorter and shorter stories and calling them books (perhaps this comes from a lack of any type of standards in self publishing...and I am all for self publishing, I just don't like laziness). My next issue is selling these short stories for close to the same price as a

full-length book. Though I also do not think it is fair to be charging the same price for an ebook as they do for the printed version. They are just making a much larger profit without all of the overhead costs involved in getting that book into our hands (by they I mean publishers et.al.). Anyway, I am just frustrated that this is a short story, as would like to have read more.

Caitlin's friend calls her in a panic and so thinking her friend is hurt she goes to Alaska. She finds out her friend is fine. She was just broken hearted. While she is there she decides to try to get some awesome pictures that might get on the cover of National Geographic. She did not expect to get attacked by a Polar Bear and end up having some Caveman rescue her. She ends up being stuck in a cabin with the man who's name she learns is Arctos. She feels this need for him. She wants to take care of him, cook for him and she just flat out wants him. Arctos thought Caitlin was a little girl when he first seen her till she moved and he seen all of her womanly curves. He wanted her from that moment until he seen her lift her camera and aim it at some polar bears and he thought it was a weapon. Regardless when he seen the Polar Bear go after her he tried to save her. He was too late though. To save her he had to start the bonding process. Which upsets him because he is not sure if she is his mate or not but he had to save her. He is touched and starts to become more certain that she is when she starts doing things for him that only a mate would. He has no clue how she will react though when he tells her what he is. An Alien/shifter whose other form can either be a Polar Bear or a Wolf. And that she is his mate. I LOVED this one. I like how she started to behave at the end when the bond really took hold. I liked that even though he only had three days that he was leary about her. He didn't jump right in just assuming that she was his true mate. I definitely recommend reading. This book is part of a series but can be read as a stand alone. I give this book 4.5 Hearts. I'm eager to read more of this Authors books.'Read and Reviewed by LSK Sweetheart Reviews'
