## Synopsis

**\$500 WORTH OF GOVERNMENT CHART AND COAST PILOT COVERAGE--MARKED WITH WAYPOINTS, BRIDGES, AND THE ROUTE!** The Intracoastal Waterway Chartbook is a complete set of navigation charts for the 1,090-mile Intracoastal Waterway from Norfolk to Miami, as well as charts for all major Atlantic inlets. The chartbook also includes a complete listing of waterway bridge and lock characteristics; anchorage listings; mileage charts; charts for a picturesque alternate route; and •new to this edition• marina listings•all in a compact, easy-to-use format. The preferred route is marked in magenta on the charts to guide you all the way down (or up) the entire length of the Intracoastal Waterway. Safe anchorage locations are also shown to keep you and your vessel safe--and rested--as you cruise. Waypoints are also given for critical locations along the entire route, allowing you to pre-plot your course in your GPS. Use this all-in-one chartbook alone or as a backup to your electronic navigation. Statute miles are noted in five-mile increments in the chart margins, along with bridge, lock, marina, and anchorage locations. A handy place-name index makes it even easier to go right to the chart showing your destination. "All the charts you need for the 1,000-mile 'Ditch' cruise for a fraction of the price." -- Cruising World "An outstanding example of economical, complete, no-nonsense chart compilation." -- Practical Sailor "An excellent compendium." -- The Capital (Annapolis, MD) "Your destination can be followed page by page in the proper order." -- Trailer Boats

## Customer Reviews

Very usable in it's small page spiral format. Flipping pages as one cruises north or south is easy,

and takes very little space at the helm. The annotations indicating marina locations save looking in separate guides when a stopping point is desired. Some obvious side trips (e.g. Banana River) are omitted and would have helped increase usefulness if included.

The charts are well organized and very reliable. Only a minimum number of aids were missing or changed in number. Some of the bridge info is a little dated but generally did not cause any navigational problems.

The charts are arranged in a great easy to use logical fashion. The best part is that it takes up very little space on your chart table or lap. I would have liked it more if it was extended to include the Keys through Key West.

This was a replacement for a much older, well-used copy. It's even better than before, with GPS waypoints added and various other adjunct features. You can tell these folks have not only gotten feedback, but used it. And it's the perfect size to sit next to you at the helm when tooling down the ICW.

This book is well worth the price. I have a Nav app on my iPhone and iPod touch that does the GPS thing but having a true chart is so much easier. I tend to use this book with binoculars and compass more than my GPS stuff. Also a plus is the bridge names are in the margins near the bridges for quick reference as well as showing anchorages. Thanks for putting together such a nice chart book.

Finally this book was updated. It is one of the best on the market and they improved it from last issue. Some suggestions are adding some more info for upstreams that are cut off. Info for going outside is excellent (inlets).

This chart book saved us on our recent trip up the ICW from Oriental, NC to Maryland. There were several areas where we had no cell reception and the GPS on our boat was a few years outdated. Without this book, we would've gotten stuck a couple of times. Very detailed and a must for any trip on the ICW.

I had an earlier edition of this Chartbook and use it religiously for my many passages up and down the ICW from the Chesapeake to Florida. The newer edition is an improvement as it added a lot of

notes to the margins of the maps (i.e. bridge openings, more anchorages, marina locations). The format is very efficient for cockpit use as it is not overly bulky and the pages can be flipped to keep pace with your progress. This format elevates my margin of safety as I can easily predict the next series of ATON's and daymarks to keep my vessel in the channel without having to search a large chart.
