# The Ultimate Dinosaur Book

## Synopsis

Describes how dinosaurs lived and died, offers profiles of the major types of dinosaurs, and identifies each species that has been discovered so far.

## Book Information

Age Range: 11 and up

Hardcover: 192 pages

Publisher: DK ADULT; 1st American ed edition (September 15, 1993)

Language: English

ISBN-10: 156458304X

ISBN-13: 978-1564583048

Product Dimensions: 9.3 x 0.7 x 11.4 inches

Shipping Weight: 2.6 pounds

Average Customer Review: 4.3 out of 5 stars [See all reviews](#) (16 customer reviews)

Best Sellers Rank: #1,189,624 in Books (See Top 100 in Books) #46 in [Books > Science & Math > Biological Sciences > Paleontology > Vertebrate](#) #180 in [Books > Science & Math > Biological Sciences > Animals > Dinosaurs](#) #1419 in [Books > Children's Books > Animals > Dinosaurs](#)

## Customer Reviews

When I received this book in 1996, it was the most complete and updated, non-technical book available on dinosaurs, so at that time, much of the information contained was new to me and accurate. After that year, my interest in dinos sank and did not return until quite recently, so I did not have my eyes focused on paleontology. But when I read about new dinosaur discoveries on the net, like the feathered *Sinosauropteryx*, the value of this book sank immediately. For example, *Seismosaurus* is no longer considered the world's longest dinosaur - it has been replaced by *Argentinosaurus*. And *T-rex* is neither considered the world's largest meat-eater any more - it has been replaced by two others as well. So, if you want an accurate book, this is not the right one. It will provide the dinosaur-loving children the wrong information! But now, I won't let this review be occupied only by the negative comments. It does have some light sides too! For example, it provides very useful information on dinosaur classification. Each group (theropods, sauropods, ornithomimids, armored & ceratopsians) is presented in detail, with a few species from each, the theropods being represented by most. All of the most popular are presented in at least two pages, some times five. Some of those are *Iguanodon*, *T-rex*, *Triceratops*, *Stegosaurus*, and *Apatosaurus*. There are lots of good illustrations of skeletons, as well as drawings of what they might

looked like in life, and at last, models of them. There is also some fast facts corner on each dinosaur. Here, the most important facts are covered, like size, when it lived, family and order, distribution, food, etc.
