Witness To Roswell, Revised And Expanded Edition

Synopsis

• "Witness to Roswell is a well-researched, well-documented, and well-written account of a very important issue." • "Dr. Edgar Mitchell, Capt. USN [Ret.], Apollo astronaut, founder of IONS • This book is the closest to the truth about the Roswell Incident you will ever stumble upon. What you have been seeking is the true story, the facts, the reality that the government withholds from you. I urge you, by all means...read on!" • "Paul Davids, executive producer of Roswell, the Showtime original movie • This is the finest Roswell book ever...well told and utterly convincing. My deepest congratulations on writing an instant classic." • "Jerome Clark, best-selling author and editor of the International UFO Reporter • There is no one on this planet who knows more about the Roswell Incident than these two guys." • "Larry Landsman, director of special projects for the SCI FI Channel and Creative Executive of The Roswell Crash • The Roswell Incident remains important for UFO research, and the case remains alive today because of the determined efforts of the team of Carey and Schmitt. Witness to Roswell contains much information from new and credible witnesses who add more weight to the existing testimony and evidence that something extraordinary crashed in 1947. Their solid and determined work is to be applauded and is essential reading for anyone interested in the events of July 1947 at Roswell." • "Dr. Mark Rodeghier, scientific director, Allen Hynek Center for UFO Studies • I think Witness to Roswell will prove to be the most important UFO book ever written. The evidence presented dovetails perfectly and makes a compelling case that an alien craft crashed outside of Roswell in 1947. After decades of controversy, the authors through dedicated and persistent research have finally come up with very strong circumstantial evidence that is tantamount to proof." • "Richard H. Hall, author of The UFO Evidence, Vol. I and Vol. II and past chairman, Fund for UFO Research The best-selling UFO book of 2007/2008 is revised and updated with even more hard-hitting eyewitness testimony of one of the most important events of all time: the actual recovery of a UFO outside of Roswell, New Mexico, in 1947. For more than 60 years, government authorities have led us to believe the wreckage was merely a very conventional weather balloon • but the witnesses who were there continue to tell a different story. Witness to Roswell once again takes you on a • can't put down • written account of what really transpired in Roswell, 62 years ago. It pries loose the truth the government doesn't want us to know. This revised and expanded edition includes:" • A growing litany of deathbed confessions describing the • little people • recovered at the crash site." • The most comprehensive time line of events ever published on this seminal event." • The identity of the Boeing engineer called in to examine the exotic wreckage from the crash." • What really took place at the Roswell base hospital and what nurse actually ordered the children's caskets." •

The story of the soldier who wore gloves at the dinner table after guarding the "bodies." Clearly, the implications are foreboding, and one need just realize that officials now have four explanations to this historic event "but to which one do all the witnesses testify on their deathbeds? Witness to Roswell once again demonstrates to the world that no statute of limitation applies to the truth: We are not alone. Donald R. Schmitt is coauthor of two best-selling books on Roswell, one of which became the TV movie Roswell. He has appeared frequently on many TV programs including Oprah, CBS 48 Hours, and the Today Show as well as many radio shows. He resides in Hubertus, Wisconsin. Thomas J. Carey has devoted significant portions of the last 16 years to proactively investigating the Roswell Incident, and has authored or coauthored more than 30 published articles on the subject. Carey has appeared on Larry King Live, Coast to-Coast AM with George Noory, and numerous other programs. He lives in Huntingdon Valley, Pennsylvania. Both authors were consultants for the Sci-Fi Channel's documentary, The Roswell Crash

Customer Reviews

Relying 100% on eyewitness and secondary witness testimony this book weaves together a picture of what the authors believed happened at Roswell back in 47'. If you don't believe the ET craft /

alien body hypothesis then the first question that you have to answer about half way through the book is simply this, "Why in the world would these people - quite a number on their deathbeds - make this stuff up?" Fame and fortune? I don't see fortunes being raked in by these supposed witnesses and if fame is having your name written up in book that just might get you weird looks at the church bingo game....well, then I guess it's worth it. Unless of course, the answer is all these people have somehow collaborated together for this story or borrowed from each other's accounts. In other words, they are all bold-faced liars. The fact that 600+ people would randomly do such a thing I believe is a bigger focus of concern than if an actual alien craft did crash near Corona. All the supposed fabrications just don't make sense. And if it does make sense where else in history do we have an example of such a lie that has the same positive benefits for those that perpetrate it? I couldn't think of any. The authors also mention a number of people who refuse to talk at all about their involvement with Roswell. If these tight-lipped folks are represented accurately by the authors - then one gets the distinct impression that they aren't talking because they are afraid of being associated with the wing nuts who believe in the ET hypothesis - it is because they fear reprisal by the Powers That Be or they feel a duty to keep the secret they were told to shut up about half a century ago. Those that do talk seem to verify this is the reason the others aren't talking.

Recently, two mile wide UFOs were sighted over the English Channel by a reputable, seasoned pilot, his copilot and several of their passengers. News of this potentially earth-shaking event was relegated to mili-second sound bytes on the majority of American news networks: and usually accompanied with a snide, derisive, condescending tone as if the pilot and passengers were Loony Tunes. Yet the same news stations endlessly - and I mean ENDLESSLY! - watch and comment upon the misadventures of a non-entity named Paris Hilton as if her every move were potentially life-altering and of vital importance to America's need to know! This is the sad state of affairs in America: focus on the idiotic while the truly important rides the back of the bus, if it rides at all. What is more important? Paris' jailhouse conversion - or a mile wide UFOs spotted over the English Channel...or the Phoenix Lights...or, yes, Roswell? To everyone who has their head buried (by choice or force) in the sand of popular, pointless bilge...please read this book! To anyone with an interest in Truth - read this book. It is gripping, enthralling and if even 1/100th of it is true - then the political and philosophical ramifications of it to we Americans (and all citizens of the World!) are immense beyond all comprehension. Yes....it is easy to follow the mindlessly flashy exploits of celebrity screw-ups. It numbs the collective brain of the country - eases it into acceptance of the trivial. But America needs wake-up calls and this book is one of them!!! Read this book and realize

that our government is a magic act and that behind its smokescreens there are serious, cosmic, incredible goings-on that we - the paying audience - never really are privy to.

Thanks in no small part to the tenacious pioneering work of Stanton Friedman in the 1970s and 80s the now famous July 1947 Roswell incident is known throughout the world as the definitive crashed UFO recovery, spirited away in secret by the US military and successfully covered up for 60 years. Plenty of books about the Roswell crash have been published and one might think that after 60 years there would be little more to add. But it turns out there is a lot more, and real meaty stuff too. Tom Carey and Don Schmitt researched the Roswell incident separately and together for years prior to the final publication of "Witness to Roswell" and both have written previous books and articles on the case. For this book they obviously did new primary research tracking down eyewitnesses and participants and recording testimony: some 600 people in total. The result is probably the definitive evidential summing-up of the Roswell incident and, due to the passage of time and the fact that witnesses grow old and don't live forever, is unlikely to be bettered. The verdict: what came down in the desert on Brazel's ranch in early July 1947 was of non-terrestrial origin, the wreckage was recovered by the US military, the craft and ET bodies were shipped by air to Wright-Patterson USAAF base on a B-29 (all documented), and the subsequent cover-up perpetrated by the government in Washington DC and its agencies was of unprecedented ruthlessness in threatening witnesses' lives and the lives of their families should any of them ever talk about the incident. Carey and Schmitt must be commended for their thoroughness in tracking down all these witnesses and piecing together the complex story.
