Customer Reviews

There is a lot of stuff floating around about Handwriting Analysis, most of it is very superficial or just repeats things heard from other places but the authors don't really have a deep understanding for WHY those lines or slants equal that trait. They also have no idea how to 'stack' traits, and just call out single, unrelated ones. "You're intelligent, you're a good listener, you focus very hard, but not always, but sometimes,..." etc. They contradict themselves, or they focus on the entertainment value of the show of handwriting analysis, not the science. Dr. Karohs is just astounding in her depth of understanding and her deep devotion to this science. She works as an industrial analyst every day, so this is not just theory that she writes about. It is real world practice and plenty of it. If the science of handwriting analysis is attractive or intriguing to you, do yourself a favor and get materials by Dr. Karohs. Many other handwriting analyst books are "McGraphology". Dr. Karohs is the real deal.
