## Customer Reviews

Very good book, it is very easy to read and very fun!! It has many techniques and information to help me in many situations, and helps to understand the workings of the mind. I feel I am able to convince my clients and make a positive influence on the opinion of my projects . It is an interesting theory that try to put into practice all the time.

Where are all these great reviews coming from? Is the author just making a bunch of different accounts? For one the information is very basic and borders on common sense. The difficult part is to execute the knowledge, which the book doesn't help with. For example, it is well known if you can control the environment, then you can influence someone's thought process. The book states this, but doesn't give any good examples or advise on how to do it really. And so it goes rehashing information that is in other books and kind of skimming the surface of a lot of topics without going into depth about it. Overall the book is interesting and ok. It may be useful in some small way, but it definitely seems over rated compared to the reviews here. It appears to be the same author as the Dantilion Jones books or whatever those other self published mind control books claim to be the author, as it rehashes basically the same information. It's an addition to one's library but it certainly

isn't the comprehensive, in depth book it appears to be.

This is a very powerful book, it helps you understand what others may think in determined situations such as job interviews, relationships, etc. As I am a lawyer, this book was very useful since it gives you some negotiation and persuasion techniques and tips that I shall use when working with my clients. Very interesting reading for anyone loving psychology and human behavior. It is 100% recommended, you will not regret buying it!!

I got this free book in Exchange for my honest opinion, it's a pretty good book on basic psychology, it contains lots of information and techniques, after reading this book I learned many things, I learned to understand people, convince them, control them. Is a book quite easy read now that is very well written, is a very interesting and good book

Having read many books on this topic this one stands out. It is not pseudoscience mixing facts with snake oil, but concise and to the point with real world examples to demonstrate the main points. Much of the substance is in other related titles but the composition and flow is better than the other titles in my opinion. This book would be a huge benefit to any salesman or business owner and unquestionably increase their profits. For me it will help me in day to day interactions and in resolving matters with my staff and clients. You will not find any hypnotism or "Jedi mind tricks" here, just sound principles on how to use social psychology to gain an edge in your interactions.

Okay, if ever there were a type A person, that would be me. I have read all the self-help books and any other book that will allow me to grow and learn to be a better person, salesperson and family member. This book cuts through a lot of junk and fluff and gets to it. I recommend this read to anyone who wants to add yet one more arrow into their quiver.

I was a bit skeptical before reading this book about whether I would get any substantial advice and as soon as I started reading it I got absorbed in it instantly! It gives an amazing and systematically ordered set of tips that will definitely teach you a lot! I recognized some of the persuasion techniques that I had succumbed to in my younger and more naive days. You will learn how to spot a deceiver from a mile and save yourself from trouble. On the other hand, you can become one and sneak into someone's area of trust following these tips. I heard of some of the tips before through a friend who used it and got exclusive business opportunities!

Very good basic psychology book, with a lot of information and techniques. But, be careful when you talk to people about Mind Control, as it puts many people in a scary place, as they think of CIA and/or Police interrogations. Most sales seminars, talk around Mind Control, as again that term can be off putting. Mind Control can be, and is used for good and bad, as you will read about. You will read about..... The use of action verbs. How to mirror and pace people. People being either Visual, Auditory or Kinesesthetic. Gas Lighting someone. The Power of Self Doubt, and how to create it. What FITD and DITF are, and how to use them. That, People tend to lose their freedom to decide something, when they are reminded over and over, that they can freely choose what to do. How to ask for and get people to do your favors. And how to get the sales, you want and need. Scary to some people, yes it is, and you will need to read the book a few times, to get all the information out of it. It will also help you, to make sure that, you are not one of the ones..... being Mind Controlled.
