Dawkins' God: From The Selfish Gene To The God Delusion

Synopsis

A fully updated new edition of a critically acclaimed examination of the theories and writings of Richard Dawkins by a world-renowned expert on the relation of science and religion. Includes in-depth analysis of Dawkins's landmark treatise *The God Delusion* (2006), as well as coverage of his later popular works *The Magic of Reality* (2011) and *The Greatest Show on Earth* (2011), and a new chapter on Dawkins as a popularizer of science. Tackles Dawkins's hostile and controversial views on religion, and examines the religious implications of his scientific ideas including a comprehensive investigation of the "selfish gene." Written in an accessible and engaging style that will appeal to anyone interested in better understanding the interplay between science and religion.

Alister Edgar McGrath (born 1953) is an Irish theologian, priest, intellectual historian, scientist, and Christian apologist, who is a professor at the University of Oxford, and is Professor of Divinity at Gresham College. He has written many other books, such as *Mere Apologetics: How to Help Seekers and Skeptics Find Faith*, *Surprised by Meaning: Science, Faith, and How We Make Sense of Things*, *A Cloud of Witnesses: Ten Great Christian Thinkers*, *Intellectuals Don't Need God and Other Modern Myths*, etc. He wrote in the introductory section of this 2005 book, "The real issue for me is how [Richard] Dawkins proceeds from a Darwinian theory of evolution to a confident atheistic worldview, which he preaches with messianic zeal and unassailable certainty... this book is not a

critique of Dawkins' evolutionary biology. I... propose to engage... the broader conclusions that he draws from these, particularly concerning religion and intellectual history.... My concern... is supremely the critically important and immensely problematic transition from BIOlogy to THEOlogy." (Pg. 10-11) He continues, "So why write such a book?..."
