Customer Reviews

Having completed a number of miles on my sailboat, in addition to a circumnavigation, I bought this book to help my new wife get acquainted with what she might want to know for her first voyage.

Thus far only having had time to read bits and pieces of this apparently well written book, I would hesitate to call it a "Woman's Adviser." Both sexes of wannabes, as well as those even considering cruising should read this. That being said, I sincerely believe there are things I too will have learned once having finished reading the book.

knowing very little about sailing, this is the first book that i read to familiarize myself with living aboard. very informational and i would highly recommend this book. While, it is very vague, it touches many subjects that one would need to know and may not have thought about.

I bought this in hopes that it would help encourage my wife wife that we could do this, and to help answer her specific questions and concerns. It did all that! I read it first and hung on every morsel of sensible advice and answers to issues both obvious and those I'd never considered. This author has obviously been there done that, and has the ability to tell it like it is while easing the anxiety and encouraging the adventure. This is an excellent read. It will come with us as a valued reference.

For anyone who has a partner who wants to go cruising , this book is excellent. Diana Jesse has prompted me to be more proactive, less afraid and looking forward to a new adventure in our lives. Buy it! Since I've read it I've completed my boatmasters qualification and the world is going to become our oyster.
