ISBN-10: 081730133X

ISBN-13: 978-0817301330

Product Dimensions: 6 x 0.5 x 9 inches

Shipping Weight: 11.2 ounces

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (9 customer reviews)

Best Sellers Rank: #1,801,073 in Books (See Top 100 in Books) #73 in [Books > Science & Math > Biological Sciences > Zoology > Amphibians](#) #145 in [Books > Science & Math > Biological Sciences > Zoology > Reptiles](#) #584 in [Books > Science & Math > Biological Sciences > Animals > Reptiles & Amphibians](#)

## Customer Reviews

Whit has portrayed his adventures with herps with amazing wit. Each chapter begins with a narrative about an episode that his zest for "research" placed him in. I read a couple of different chapters to a friend over the phone (imagine an alligator in the cab of your truck!) and we both laughed so hard we were in tears. At the end of each tale is a lesson in sound zoology. Most field biologists will recognize themselves in this book.

I've read this book a dozen times and I laugh out loud - even knowing what's coming - every time. Warm, clever, informed and hilarious. Whit Gibbons is a treasure to field biologists and normal people alike.

Whit Gibbons gives a truly funny account of his time as a graduate student and professor, chasing reptiles through the southern US and abroad. It's funny, it's informative. This is no textbook, but rather tales of life and animal research.

Just read the book and you will cry you laugh so hard. Just imagine being a student in his class like I am. It is the best class I have ever taken hands down. Whit is remarkably intelligent in all areas of herps and this book is a wonderful example of how dedicated he is to this passion.

The book has a amazing binding and the caps are very well divided. Furthermore, it arrived earlier than I expected. Gibson makes different links between the Herpetology and how the community see that, demonstrating his idea in a clear way. This is a good buy.
