Customer Reviews

As a hockey Referee and Instructor for the last 25 years I was appalled by all the bad or just plain wrong information in this book. I was hoping there would be more of the realities of the business in here not just some fantasy land ideas from someone who obviously looks at the job of referee as just a way to make money. The reality is that the Hockey Referee is an educator first, and even

though the pay can be good in some areas of the country, that is not the case for most amateur hockey in the USA or Canada. In most areas the pay is bad, the hours are long and the fans and coaches suck!!! For most referees, after you pay for your food and gas and time on the road, you are lucky to break even or maybe have enough for a new piece of equipment. After years of trying to climb the ladder, most refs don't have the skill and connections to get to the leagues where you can really say that you are making good money as a hockey official. For most people, the reason for becoming a referee is simple. It's not for the money, it's for the love of the game! After reading this book, I think it should have been titled "How not to think about the officiating business". What the author tells you about making money is exactly the opposite of what the "experts" will tell you. Don't waste your time or money with this book. If you are new to the Referee world this book will give you some very "WRONG" ideas of how the very small world of officiating works.
