# The Greatest Lie On Earth: Proof That Our World Is Not A Moving Globe

## Synopsis

This book reveals the mother of all conspiracies. It sets forth biblical proof and irrefutable evidence that will cause the scales to fall from your eyes and reveal that the world you thought existed is a myth. The most universally accepted scientific belief today is that the earth is a globe, spinning on its axis at a speed of approximately 1,000 miles per hour at the equator, while at the same time it is orbiting the sun at approximately 67,000 miles per hour. All of this is happening as the sun, in turn, is supposed to be hurtling through the Milky Way galaxy at approximately 500,000 miles per hour. The Milky Way galaxy, itself, is alleged to be racing through space at a speed ranging from 300,000 to 1,340,000 miles per hour. What most people are not told is that the purported spinning, orbiting, and speeding through space has never been proven. In fact, every scientific experiment that has ever been performed to determine the motion of the earth has proven that the earth is stationary. Yet, textbooks ignore the scientific proof that contradicts the myth of a spinning and orbiting globe. Christian schools have been hoodwinked into teaching heliocentrism, despite the clear teaching in the bible that the earth is not a sphere and does not move. This book reveals the evil forces behind the heliocentric deception, and why scientists and the Christian churches have gone along with it.

## Customer Reviews

Phenomenal book. Having read Zetetic Astronomy immediately prior, I was familiar with some of the arguments. But Hendrie is a little bit more thorough and convincing in his arguments. Furthermore, he has the benefit of high-res photo evidence, which Rowbotham did not have at his disposal. I was pleased to see Hendrie delve into the moon hoax, another subject I've been interested in. I've tried

twice to get through Dark Mission by Richard Hoagland and twice have failed. The book is dry and, to me, not very believable. So I was pleased again when Hendrie affirmed a thought I had about Hoagland. Quote: "Bill Kaysing has good reason to believe that Hoagland is a shill working for NASA, who is trying to divert attention away from the fact that NASA never went to the moon." (p. 183) The final half of the book turns toward the pervasive influence of Judaism throughout the world, including science. This was an unexpected twist, but it fits perfectly -- and, again, dovetails nicely with my research into the Holocaust, Zionism, false flags, etc. The book's primary shortcoming is that it does not address the issue of satellites. I have been looking for a comprehensive text or video on this subject, but have not found one yet. So far, I have suggested this book to my dad and a friend, both of whom have said they will read it.

I enjoyed the book. It starts out with a satisfactory explanation and decent evidence to prove that the earth is flat. He quotes from several of the earlier writers that have already done a great job in this regard. The author goes on to present a good picture of the who, what, where & why the heliocentric hoax was perpetrated on the world in first place and this is where the book really starts to take off. He does a great job of connecting the dots for the reader here. Lots of source references and foot notes too. Reading this book is definitely worth your time.

This book is not to be missed. The truths it reveals have long been stolen from the Church and need to be restored. The author has done this simply, honestly, and convincingly. I predict that this book will rival in effect, power and scope the effect that Martin Luther had on the church and world of His day and am so grateful that it was made available to me in our time. Anyone who loves God and His Word will be exceedingly blessed to read this book.

I rarely write reviews for things, but I have to for this book. I heard Edward Hendrie on the Texe Mars show talk about the flat earth. If it wasn't on this show I probably wouldn't have listened, but I'm glad I did. After Mr. Hendrie identified himself as an attorney, if I remembered correctly, I figured he'd probably have at the very least an interesting case for the flat earth. The same questions that I'm sure pop up in most people's minds before they know much about this subject are things like what about NASA? What about the edge? How could they contain a secret like this? What about astronomy and science and high altitude jets and rocket etc.? Well, if you have all these questions. Don't worry there are really good answers to these question. Edward Hendrie goes through great details in this book, from the moon landing to cgi and composite photos of the earth to numerous

scientific experiments showing that the earth is stationary. I'm very very glad that I bought this book. I also tried to fact check some things mentioned in this book and everything was there after a quick Google search. I also highly recommend browsing YouTube for flat earth related material. There's lots of great info out there on this subject and growing everyday. But this book without a doubt revealed MANY evidences for the flat earth that are compiled and presented very well.

Excellent book! Though I haven't finished it yet, I really enjoyed Chapter 5, "Airplane Level Flight Proves the Earth is Flat." The FAA, in addressing their Target Generation Facility (simulator), puts it succinctly; "The observant reader will notice that the aircraft equations of motion were calculated ASSUMING A FLAT EARTH...." Not sure why doesn't have the digital version. Google Play does, and it's only \$3.03 currently. If you've read Zetetic Astronomy, Earth Not a Globe (Rowbotham), and The Flat Earth Conspiracy (Dubay), you owe it to yourself to read this one too.

Now, if you love truth no matter your reputation, relationships and job security then by all means GET this book. Lies over the centuries have brought us to blissful ignorance. This truth will give your life new meaning and create a stronger faith that you can only imagine. Love for Jesus and others will grow. Just know this before... not everyone has to know or even wants to know THE truth of the plane they live on.

Edward Hendries book was a most fascinating read. Though I am not a flat earther. The book does give you much information to look into. And also think about too. I thoroughly enjoyed. And I'm sure you shall too.

This book is packed with 425 pages of amazing content. If you have an inquisitive mind, and want to understand why anyone would be drawn to favor the concept of a flat and fixed/immoveable earth verses a globe earth model that is spinning through the universe...then this book is a MUST HAVE and MUST READ! Thank you Edward Hendrie for putting this amazing work together to share with mankind!
