This book has everything you need to know about football. Some of the information was great for me because I learned about strategies, positions and basics of the game, but there is so much more. The book explains the gear and equipment you need to play football and gives excellent advice on what to get. It tells players how to eat to get to optimum performance and what food and supplements can help keep your body strong and healthy so that you can keep playing. It gives several stretching exercises that help keep muscles and bones toned and ready to play. There is a whole chapter on strength training with programs, techniques and exercises to build the body. It doesn't stop there. It goes into the mental part of the game, like thinking you are good at playing, visualizations, affirmations and more to keep your mind keen and focused and concentration methods to keep you in the game. The best part is that this guide works for anyone at any skill level. This is a must-read for all fans and players of football!

When we label people as naturally talented, or smart it is a back-handed compliment that tries to downplay their efforts while excusing our own laziness. Everyone who is talented or gifted came by it the hard way, through dedicated hard-work. To get started we all need an ignition or trigger that gives us enough forward momentum to start moving in the direction of our desired goal. These triggers can come from anywhere, but once set off it is our job to find ways to keep that fire burning because the destination is a long journey that takes time. This book helped shore up my own belief in human potential and that it rests with the individual not on luck but hard-work.
