Warning buyers now, the newer books don't come with codes! (Most don't now a days) did however, have a special when I brought this page up and said I could bundle with the code for like an extra 60 bucks. Now I don't know about you but that came out to be like 130-140 bucks total for me. (Both were on sale) Now at my college, the items separately? You were looking at least 100 bucks minimum for the code and 140 for the book. The bundle on here was an excellent deal. Only downside is? Risk of the code not potentially working, like mine unfortunately. Hoping it was just a misprint and I can get it situated with tech support. Like I said, if you want to take the risk, it's not a bad deal at all. Just warning you all ahead of time.

Book came on time! :D I just wish the content was more visual with like calculator help and such. I

like the application to real life though which is a good thing. Didn't need it for my class, but good to keep on the side just in case.

Delivery was on time since I asked for express delivery. The book quality is not so great. Inner binding of the book is slowly coming apart and with wear and tear of using it this semester even if I'm careful the book will fall apart. It helps me get through homework, but since it is a rental. I'm unhappy with it since it is starting to fall apart some more in my possession.

Unfortunately the e-book does not come with the online homework code so if you need that as well do not purchase it or else you will be paying an additional 80\$ for the code.

Great price not bad condition at all and received when said thank you I would recommend for people to rent or buy it

Between this book and Youtube I finally figured out Algebra! I didn't expect a textbook to help with using a calculator but it has step by step instructions for things like graphing, and irrationals.

I received this book and all I can say is 5 stars. I received the book in the best condition, The sales description was 100% accurate. Thanks so much I'm Very happy with my purchase

I liked that the book was not a hard cover so it makes it easy to carry it in my book bag. The price was very affordable compared to the books at the school's Book Store :)
