More Encounters With Star People: Urban American Indians Tell Their Stories

Synopsis

AUTHENTIC STORIES OF ALIEN CONTACT WITH URBAN AMERICAN INDIANS Following on her bestselling book, Encounters with Star People, which told the stories of those living on the reservation, Ardy Sixkiller Clarke's new book details the UFO stories of American Indians who live off the reservation. One intriguing difference between the two groups: there were more cases of physical evidence presented to back up the testimony of urban American Indians. As with her first book, this volume not only recounts their encounters, but the recounting itself becomes part of the story. A professor emeritus at Montana State University, the author reveals herself as part UFO investigator, part journalist, part therapist, and part friend. The result is a work of great authenticity.

Book Information

Paperback: 338 pages

Publisher: Anomalist Books (July 25, 2016)

Language: English

ISBN-10: 1938398629

ISBN-13: 978-1938398629

Product Dimensions: 6 x 0.7 x 9 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)

Customer Reviews

Every bit the equal of her two previous books on UFO encounters. No one has done as much sheer leg work as Ardy. She has been indefatigable in collecting stories and is always "on point" so to speak no matter where she happens to be - what my Dad used to call a "real bird dog." This third book may be my favorite simply because it is thicker and has more stories. I have already thumbed and frowzled the first two books like some Bible fundamentalist, so now I have a new book to "fold, spindle, and mutilate." Thank you again, Ardy. I really mean that.

Dr. Clarke has written another excellent book. This one centers on American Indians who do not live on the reservation but have had UFO encounters. No two stories are alike, each one seems so

believable. The people she interviews, for the most part, just want their story to be heard. I found these stories to be even more interesting than her first book. If you have an open mind, this is a must read.

To the world, Eric von Daniken introduced the theory that humans have a history which includes life beyond our planet Earth. Ardy Sixkiller Clarke brings it home! In her travels she interviews American Indians who have had experiences with visitors from other planets. Also, historical tribal acknowledgement of life outside of Earth. The book is captivating, curious, and well written. It is as though the reader is traveling with the author. Her books document a part of American history that could possibly become lost with time. I will keep this and her other books as part of my library.

With the same warmth and compassion she showed toward her interviewed guests in her other books, the author digs even deeper into the lives and consequences of alien contact. More thought provoking and a real eye opener of a book!

Instinct transcends knowledge. • Instinct is something which transcends knowledge. We have, undoubtedly, certain finer fibers that enable us to perceive truths when logical deduction, or any other willful effort of the brain, is futile. • ~ Nikola Tesla.....if you have any doubts, follow your gut on the veracity of these stories; they are both true and wonderful in that they validate for me all of the things I have read and heard about UFO lore since the 1940s. This book and Ardy's first two belong in the library of any serious student of ufology....all are stimulating and thought-provoking works and invaluable resources of truth for what is and has been happening on our planet.

I find Dr. Clarke herself to be as fascinating as the American Indians she interviews for this collection of stories about their experiences with the UFO phenomenon and the influence of Star People on their culture. Independent, straightforward and open, she elicits important information from credible witnesses who often become special friends. I have read three of her books now and hope she writes more and keeps going strong.

Ardy Sixkiller Clarke has done it again ! She has collected fascinating stories from urban variety American Indians about their encounters with UFO's and Aliens. Their stories are sometimes sublime and at times very disturbing. Along the way we meet sometimes colorful characters who share their incredible stories. They did not ask for notoriety and indeed kept their encounters inside

for fear of ridicule or in some cases to protect their "friends" the Star People. Dr. Clarke has given them a voice so that the world outside their lives will know. As in her previous books, she shows great compassion and understanding for her storytellers. Future historians would do well to consult her works as a window on our attitudes concerning Alien contact. Yet, we don't need a future historian if we read and open our eyes and minds to what is around us. Thank you Ardy !

Loved this book. My only problem was trying not to rush through it. If you liked Dr. Clarke's previous two books, you will most definitely be intrigued by this latest collection of encounters. For some reason, a large number of the accounts in this volume take a bit of a darker turn. Not all visitors are of the ancestors, nor are they of good will.
